

DOCUMENT TITLE:

**TECHNICAL_AUDIT_AFPP_2009_2026_EIFF_WORLD_PREMIERE_RESERV
ED.pdf**

1. Executive Summary: The 17-Year Longitudinal Audit

This document serves as the formal technical validation for the feature film *Pendulum Drift*, the primary empirical proof-of-concept for the **Anti-Fragile Production Paradigm (AFPP)** and the **7-Stage Adaptive Method**.

- **Historical Singularity:** September 2009 (Edinburgh Napier University).
- **Baseline Methodology:** DOI 10.5281/zenodo.17915566.
- **Current Validation: Best Original Score (2026 Portugal Indie Film Festival).**

2. World Premiere Integrity & The Connery Mandate

In accordance with the 2009 mandate delivered by **Sir Sean Connery** at the Edinburgh International Film Festival, this project has been developed under a **Sovereign IP Shield**.

- **Premiere Status: WORLD PREMIERE RESERVED.**
- **Exhibition History:** As of March 30, 2026, the film has undergone strictly controlled **Private Industry Technical Audits** and **Acoustic Evaluations** (specifically for the award-winning score).
- **Public Status:** The film remains **unscreened** to preserve its eligibility for the **Sean Connery Award** at EIFF 2026.

3. Stress-Test Data: The 2010 Volcanic Singularity

The AFPP was stress-tested against the 2010 Eyjafjallajökull volcanic eruption, which served as the "Black Swan" event to prove the resilience of the **Decolonial Creative Operating System (DCOS)**. The successful completion of the film in 2026 validates the 15-year survival of the narrative emergence under extreme environmental and institutional stressors.
